

Ranger Remote Control

Giving teachers control in the classroom

Enhanced teaching and learning

Ranger Remote Control is intuitive and easy to use, allowing teachers of all technical abilities to confidently and effectively control IT use during lessons.

With Ranger Remote Control, you can remotely view and take control of students' PCs. Teachers can demonstrate work, interact with individuals or groups, provide support, assess progress and gather feedback – without the need to visit the student's desk. This empowers teachers, while freeing up technical staff to focus on network management issues.

Technical staff can also provide remote assistance to teachers and students using 'Chat' and 'Control' functions.

Creativity in a safe environment...

Empowering and effective

Ranger Remote Control is intuitive and easy to use, allowing teachers to feel confident in their ability to use IT technology, ensuring that students benefit from a dynamic and stimulating, yet safeguarded, learning environment.

Control and monitor

Monitor individual students' computers from a single PC and display multiple screens simultaneously for an overview of the whole class. Take control of an individual's PC to demonstrate work or offer them help.

Ranger Remote Control allows teachers and technical staff to restrict access to particular websites or applications. It also allows you to block use of printers and removable media. Teachers gain the immediate attention of the class by instantly locking all screens and keyboards or by blocking internet access at the click of a button.

Enhanced teaching and support tools

With Ranger Remote Control, teachers can interact with individual students, groups or the whole class without leaving their desk or taking their attention away from other students.

Teachers can broadcast their screen on the student's desktop to demonstrate work. They can also distribute files or web links to all students simultaneously.

Optimal assessment and organisation

Ranger Remote Control can be used to set and administer tests, gather feedback through instant surveys and dynamically group students based on their responses. Ranger Remote Control also gives teachers the option of creating fully automated lesson plans and of distributing and collecting class work automatically.

Features

- Control which applications and websites students have access to during lessons
- Immediately block all internet access and lock all workstation screens and keyboards at the click of a button
- Record and replay students' screen activity to illustrate a point, facilitate assessment or demonstrate progress
- Take control of students' PCs to demonstrate work or provide assistance
- Provide discreet student support through instant pop-up messages, 'Chat' and 'Help' requests
- Block the use of printers, USB sticks and MP3 players

Benefits

- Save time during lesson preparation and delivery
- Give teachers control over IT in the classroom and free up technical staff to focus on network management tasks
- Enable teachers to keep a watchful eye on what students are doing on their desktop
- Intuitive interface means that teachers of all technical abilities can feel confident using Ranger Remote Control
- Provide a secure and robust environment to encourage creativity using ICT

Your rules...

Your choice

When it comes to specific requirements for your school or college, you're the expert – we just provide you with the tools to help you manage your network in the most effective way possible.

Ranger offers a comprehensive portfolio of products to simplify and enhance your basic network, and you're free to select the best combination to suit your specific needs.

So there isn't one 'right' way of doing things – just the right choice of partner...

Your views

"Using Remote Control, teachers are able to limit access within their classrooms to applications, internet sites or even computers. I'd have no hesitation in recommending the entire Ranger suite of applications"

Steve Smith, ICT Network Manager, Oxclose Community School, Tyne and Wear

"Ranger Remote Control has replaced NetOp as our classroom monitoring software. Members of staff have, so far, experienced little difficulty in the conversion process."

Colin Thomas, IT Network Administrator, Rossall School, Lancashire

"We've set up Ranger Remote Control in each of our computer rooms to allow teachers to praise the efforts of individual students by displaying work on the interactive whiteboard. You can also spot and help students in difficulty and manage the classroom, e.g. by making all PCs inaccessible while you are talking to the class. This has been a big hit with our teaching staff."

Anthony Nutbeam, Assistant Principal and Director of Networks, Astor College, Kent
